

## **Function `holoscan::viz::SetCudaStream`**

# Table of contents

Function Documentation

---

- Defined in [File holoviz.hpp](#)

## Function Documentation

void holoscan::viz::SetCudaStream(CUstream stream)

Set the CUDA stream used by Holoviz for CUDA operations.

The default stream is 0, i.e. non-concurrent mode. All CUDA commands issued by Holoviz use that stream. The stream can be changed any time.

Parameters

**stream** – CUDA stream to use
