Struct InferenceOp::DataVecMap

Table of contents

- Defined in File inference.hpp

Nested Relationships

This struct is a nested type of Class InferenceOp.

Struct Documentation

struct DataVecMap

>DataVecMap specification

>Public Functions

>DataVecMap() = default

>inline explicit operator bool() const noexcept

>inline void insert(const std::string &key, const std::vector<std::string> &value)

>inline std::map<std::string, std::vector<std::string>> get_map() const

>Public Members
