

Template Struct `_type_info< Parameter< std::shared_ptr< T > > >`

Table of contents

Struct Documentation

- Defined in [File type_traits.hpp](#)

Struct Documentation

```
template<typename T>  
struct _type_info<Parameter<std::shared_ptr<T>>>
```

Public Types

```
using container_type = scalar\_type
```

```
using element_type = std::shared_ptr<base\_type\_t<T>>
```

```
using derived_type = std::decay_t<T>
```

Public Static Attributes

```
static constexpr int32_t dimension = 0
```
