Chapter 1.
NGC-READY CSP DOCUMENTATION

NVIDIA® GPU Cloud (NGC) containers leverage the power of GPUs based on the NVIDIA Pascal™, Volta™, or Turing™ architectures. NVIDIA DGX systems as well as NVIDIA Turing, Volta, or Pascal-based virtual machines hosted on cloud service providers utilize these GPUs.

The following lists the documentation provided by cloud service providers that have been validated by NVIDIA as "NGC-Ready".

**Using NGC with Oracle Cloud Infrastructure**
This setup guide explains how to set up an NVIDIA GPU Cloud Image on Oracle Cloud Infrastructure.

**Using NGC with OVH Cloud**
This setup guide explains how to set up an NVIDIA GPU Cloud Image on OVH Cloud.
